EXPERIENCE

DOT COM DEVELOPMENT, LLC, SCOTTSDALE, AZ

MAY 2019 – OCTOBER 2019

Frontend Developer and Designer

Worked as a Frontend developer and designer for “Evocai,” an AI driven e-commerce platform.

- Began the project tasked with establishing the information architecture of the application with high fidelity workflows built in Adobe XD.
- Built frontend components consisting of the home screen, on-boarding, notifications, etc. in React Native; all in line with the intended design.

THUMBNAIL CONSULTING, PHOENIX, AZ

NOVEMBER 2018 – APRIL 2019

Frontend Developer and Designer

Worked as a contracted UX / UI designer along with Frontend development in React.

- North Valley Mechanical. A basic application for tracking employees in the field, communicating with customers, and reminding customers when they need AC maintenance.
- Thumbnail Payment Portal. A simple application for processing invoices to clients, including branding, alternate appearances, etc.
- Mystic CRM: An application with appointment management, automation, email templating and analytics, employee management, file storage, lead tracking, project tracking, a built-in calendar for scheduling, and surveying features.

CEAD, PHOENIX, AZ

JANUARY 2020 – JANUARY 2022

Frontend Developer and Designer

Founded the company with three fellow full stack web developers. Helped lead the development of three applications.

- Trip Clock Mobile. An application that tracks a mobile employee's location and hours while also collecting mileage data for tax purposes.
- Carpet Guys Mobile CRM: An application that tracks an employee's location and hours, and also allows them to take photographs of jobs, schedule appointments, and send app to app messages.
- CEAD: An application for dispensaries to track inventory, queue incoming customers, and manage a customer's allotment of Cannabis.

WOZ U, SCOTTSDALE, AZ

JUNE 2017 – DECEMBER 2017

Software Engineer Bootcamp Graduate

Woz U is an online school started by Apple co-founder Steve Wozniak that provides training in software development, cybersecurity, and data science.

- Completed full stack web development curriculum with Node.js specialization. Courses: HTML, CSS, JavaScript, Node.js.
- Software: Atom, Command Prompt, GitHub Desktop, Postman.
